

### Geography

#### Why Does Population Change?

Children will investigate the reasons behind population growth and decline, including migration, birth rates, and environmental factors. They will explore global and local population trends

### Science

#### Forces and Space: Unbalanced Forces

Children will explore how forces affect motion, including gravity, friction, and air resistance. They will investigate unbalanced forces and how they influence movement in space and on Earth.

### P.E

#### Rugby

Children will develop their skills in rugby through expert coaching provided by an EVSP Specialist. They will learn key techniques such as passing, catching, evasion, and teamwork.

### MFL

#### School Days

Children will learn vocabulary and phrases related to school life, including subjects, routines, and classroom instructions. They will practise speaking and listening through role-play.

### Computing

#### Programming: Further Coding with Scratch

Children will deepen their understanding of coding by creating interactive projects using Scratch. They will use loops, variables, and conditionals to enhance their programs

### R.E

#### What makes some texts sacred?

Children will explore sacred texts from different religions, understanding their significance, stories, and teachings. They will reflect on how these texts influence beliefs and practices.

### Design & Technology

#### Mechanical Cars

Children will design and build model cars using mechanisms such as axles and wheels. They will investigate how movement is created and controlled in mechanical systems.

### PSHE

#### Health and Wellbeing

Children will learn about physical and mental health, making healthy choices, and managing emotions. They will explore strategies for self-care and resilience.

### Music

#### Rock and Roll

Children will explore the history and features of rock and roll music. They will listen to classic tracks, identify instruments, and create their own rock-inspired performances.

## Autumn 2 Mighty Oaks (Year 5/6) 2025-26
